O.F.A. NUMBER

This number issued with the right to correct or revoke by the Orthopedic Foundation for Animals.

RESULTS:

Normal cardiovascular examination via auscultation - No evidence of congenital or acquired heart disease was noted. Since acquired heart disease may develop later, these evaluation results remain valid for one year, and annual examinations are recommended to continue to monitor cardiac health.

Disease Test Results

The results listed below represent genetic disease tests performed by Paw Print Genetics on this dog and are based on the sample(s) submitted to Paw Print Genetics.

*WT - wild type (normal); M - mutant

Disease	Genotype*	Interpretation	Test Date
Degenerative Myelopathy	WT/WT	Normal (Clear)	May 12, 2023
Degenerative Myelopathy (Bernese Mountain Dog Type)	WT/WT	Normal (Clear)	May 12, 2023
Von Willebrand Disease I	WT/WT	Normal (Clear)	May 12, 2023

Disclaimer:
Paw Print Pedigrees is an open website set up by Paw Print Genetics so that breeders and owners of dogs that have been tested in the Paw Print Genetics laboratory may voluntarily opt to share their canine genetic testing results. Paw Print Genetics and Paw Print Pedigrees do not make any claims to the accuracy of the information displayed for breeders or dogs, with the exception that all testing performed by Paw Print Genetics is accurate and reflects the results of the dog displayed. Those wishing not to publicly display their results should not share their results. This site is voluntary and any participant may decide to remove certain genetic test results or other information at any time. The test results and other information chosen to be displayed or removed are selected by the participant. Therefore, test results displayed may not reflect all testing performed in this dog.

Patient Information

Client: Burkholder, Dean	Tattoo Num:
Patient Name: Horseshoe Acre's Dillon	Patient ID: 4041
Reg. Name:	Registration Num:
PennHIP Num: 204593	Microchip Num:
Species: Canine	Breed: BERNESE MOUNTAIN DOG
Date of Birth: 07 Nov 2021	Age: 32 months
Sex: Male	Weight: 102 lbs/46.3 kgs
Date of Study: 23 Jul 2024	Date Submitted: 23 Jul 2024
Date of Report: 23 Jul 2024	

Findings

Distraction Index (DI): Right DI = 0.43, Left DI = 0.27.

Osteoarthritis (OA): **No radiographic evidence of OA for either hip.**

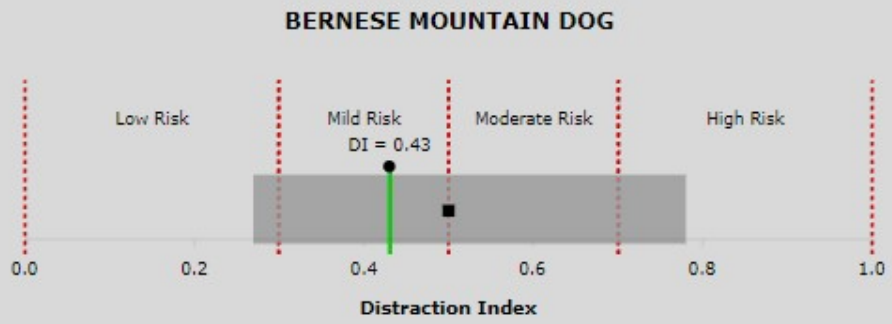

Cavitation/Other Findings: No cavitation present.

Interpretation

Distraction Index (DI): The laxity ranking is based on the hip with the greater laxity (larger DI). In this case the DI used is 0.43.

OA Risk Category: The DI is between 0.31 and 0.49. This patient is at mild risk for hip OA.

Distraction Index Chart:

BREED STATISTICS: This interpretation is based on a cross-section of 4613 canine patients of the BERNESE MOUNTAIN DOG breed in the AIS PennHIP database. The gray strip represents the central 90% range of DIs (0.27 - 0.78) for the breed. The breed average DI is 0.50 (solid square). The patient DI is the solid circle (0.43).

SUMMARY: The degree of laxity (DI = 0.43) falls within the central 90% range of DIs for the breed. This amount of hip laxity places the hip at a mild risk to develop hip OA. **No radiographic evidence of OA for either hip.**
